the Former Yugoslavia

AUTOPSY REPORT

KOZLUK GRAVE SITE

CASE NO: KK3 520B

AUTOPSY DATE: 30.08.99

MORTUARY: Visoko

SUMMARY:

A complete body with dried skin and soft tissues in the trunk and legs but with partial skeletonization elsewhere.

As established from anthropology data the person was male, aged between 31 and 71 and measured from 166 to 182 cms in height. There were no particular identifying features

The only injuries present were depressed fractures of the front of the skull including the lower jaw, of several ribs on both sides of the chest, and of the left side of the pelvis, but all appeared to be post mortem in nature from crushing or moving the body after death.

There were no obvious bullet injuries and no other significant findings. The cause of death in this person therefore, from this examination, remains unascertained.

CAUSE OF DEATH:

It is my determination that the cause of death in case number **KK3 520B** was:

Unascertained

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed:..........

Dr. John Clark, MB ChB FRCPATH Dip. FM

Date: 31.08.99
