

AUTOPSY REPORT

KOZLUK GRAVE SITE

CASE NO: KK3 181BP

AUTOPSY DATE: 10.08.99
MORTUARY: Visoko

SUMMARY:

These were the partially skeletonized remains, with saponified soft tissues still adherent to the bones. The body was almost complete.

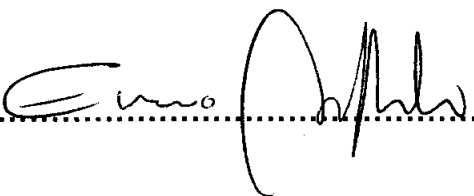

From the anthropological data, the person was male, aged 31-71 years old and measured 163.2 +/- 7.7 cm in height.

He would appear to have died from a gunshot injury to the head, which had caused complete fragmentation of the base of the skull, very typical of a high velocity rifle injury, into the median occipital region there was the entry hole of the gunshot, oval shaped. The direction was tangential to the bone surface right to left.

CAUSE OF DEATH:

It is my determination that the cause of death in case number **KK3 181BP** was:
Gunshot wound to the head

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed: 

Dr Enrico Manfredi, Medico Chirurgo, Specialista in Medicina Legale
