AUTOPSY REPORT
GLOGOVA GRAVE SITE

CASE NO: GL02 027BP

AUTOPSY DATE: 01.10.99
MORTUARY: Visoko

SUMMARY:

Parts of a body only, including the skull, neck bones, right shoulder, and some ribs, the remains being completely skeletonized.

From anthropology estimation, the person was male and adult i.e. over 17, but it was not possible to determine anything further.

There was evidence of a gunshot wound to the shoulder, fragmenting the upper part of the arm bone and the collarbone, and with an intact bullet lying alongside. There was possibly associated damage to three of the bones in the neck.

While this injury could have proved fatal, it would be difficult to prove this completely, and with the absence of the rest of the body, it is better to leave the cause of death of this person as unascertained.

There were no other significant findings.

CAUSE OF DEATH:

It is my determination that the cause of death in case number **GL02 027BP** was:
Unascertained

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed:.....

Dr. John Clark, MB ChB FRCPath Dip. FM

Date: 02.10.99

A. GENERAL DESCRIPTION OF REMAINS:

Parts of a body only – skull, and bones from neck and right shoulder region including some ribs. Little muddy material adherent but otherwise skeletonized

B. CLOTHING:

None

OTHER ITEMS:

None
