AUTOPSY REPORT

GLOGOVA GRAVE SITE

CASE NO: GL02 097BP General Body Parts

AUTOPSY DATE: 06.10.99
MORTUARY: Visoko

SUMMARY:

A collection of assorted bones from all parts of the body from at least three individuals. There were no soft tissues surviving.

As established from anthropology examination, two of the individuals were adult and the other a younger person i.e. someone aged under 17. It was only possible with one bone to say that the person was male, with the others it was not possible to say whether male or female.

Several of the bones were fractured but pieces were missing and it was difficult to know what caused these or whether they occurred before or after death. None of them showed any particular features of gunshot damage.

The only other findings were a possible single shotgun pellet with the remains.

From this examination it is not possible to determine the cause of death in these persons.

CAUSE OF DEATH:

It is my determination that the cause of death in case number **GL02 097BP General Body Parts** was:

Unascertained

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed:.....

Dr. John Clark, MB ChB FRCPath Dip. FM

Date: 07.10.99

A. GENERAL DESCRIPTION OF REMAINS:

A collection of bones from all parts of the body, from at least 3 individuals, two of them adults, one of them a young person. No soft tissues remaining.

B. CLOTHING:

None
