## **AUTOPSY REPORT**

GLOGOVA GRAVE SITE

**CASE NO:** GL02 114BP

**AUTOPSY DATE:** 06.10.99  
**MORTUARY:** Visoko

### **SUMMARY:**

A group of bones from the neck region – the spine, right collarbone and the right top rib.

From anthropology examination they were from a young person, someone under the age of 21, but it was not possible to say whether male or female or to determine anything further.

Both the collarbone and the rib were fractured, with substantial pieces missing, and while this could have been from a gunshot injury, this could not be proved, nor is it certain that the injuries occurred before death.

There were no other findings, and from this examination it is not possible to determine the cause of death in this person.

### **CAUSE OF DEATH:**

It is my determination that the cause of death in case number **GL02 114BP** was:  
**Unascertained**

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

**Signed:**.....

**Dr John Clark MB ChB FRCPath Dip FM**
