the former Yugoslavia

AUTOPSY REPORT
GLOGOVA GRAVE SITE

CASE NO: GL02 115B

AUTOPSY DATE: 29.09.99
MORTUARY: Visoko

SUMMARY:

A more or less complete body minus only occasional ribs, the right hand, and a few bones from the left hand. There was an additional wrist bone and part of a collarbone from another person or persons mixed in. The remains were partly skeletonized but with a substantial amount of greasy soft material still present.

As established from anthropology examination, the person was male, aged between 31 and 60, and measured from 167 to 183 cms in height. There were no particular identifying features.

He died from a gunshot injury to the head, with a bullet entrance hole on the left side of the top of the skull, and the exit probably on the right side opposite, where there was extensive fracturing and much of the bone missing. There were no bullet fragments remaining.

The only other injuries were fractures of a number of ribs on the right side of the chest, but it was not possible to say what caused these or whether they occurred before or after death.

CAUSE OF DEATH:

It is my determination that the cause of death in case number **GL02 115B** was:
Gunshot wound of head

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed:.....

Dr. John Clark, MB ChB FRCPath Dip. FM

Date: 02.10.99

A. GENERAL DESCRIPTION OF REMAINS:

Largely complete body, in clothing, partly skeletonized but with substantial amount of soft greasy material still attached

CLOTHING:

- Fawn sweatshirt with black hood, and black and white stripes on sleeves and '101st Street New York' on front
- Black sleeveless T-shirt
- Fawn corduroy trousers with thick leather belt
- Red shorts with fine vertical blue stripes
- White underpants

- Metal bracelet with 'Rambo' written on it – from right wrist

C. IDENTIFYING FEATURES:

Sex:

From examination of soft tissues: Not possible

From anthropology details: Male

Age range (from anthropology data): 31 - 60

Build: Not possible

Height (cm):

From estimation of intact body: Not possible

From anthropology data: 174.8 +/- 7.7

Hair:

Head hair: Dark

Facial hair: Not possible

Teeth:

General description: Natural teeth in both jaws in good condition

Retained for dentist: No

Tattoos: Not possible

Scars: Not possible

Other features: None

D. BODY PARTS MISSING: See Anthropology Report

E. INJURIES:

i. **Findings on fluoroscopy:**

- No metal fragments seen

Radiographer: Bruno Tonello

ii. **Main injuries described:**

<u>Probably ante-mortem</u>	<u>Probably post mortem</u>	<u>Can't tell</u>
---------------------------------	---------------------------------	-----------------------

Head and Neck:

1. Gunshot injury to skull, with circular entrance hole, 0.8 cm diameter, in left parietal region over suture, showing internal bevelling, and the right margin opening into a large defect in the top of the skull. Much of right side and posterior half of skull missing, presumably being part of the exit

√

Trunk:

2. Ribs right: fractures
 - 7th 8th and 9th in mid-clavicular line
 - 9th at angle

√

√

F. INTERNAL TISSUES:

None

H. SAMPLES AND ITEMS RETAINED:**SOCO:** Ronnie Govender**Bullets/Shrapnel:**

None

Anthropology:

Right clavicle
Right 4th rib

DNA:

Right femur
Tooth

Other:

None
