AUTOPSY REPORT

GLOGOVA GRAVE SITE

CASE NO: GL05 043(ii) BP

AUTOPSY DATE: 12.10.99
MORTUARY: Visoko

SUMMARY:

The upper end of a left forearm bone, within clothing. It was completely skeletonized.

From anthropology examination it was from an adult, someone aged over 17, but it was not possible to say whether male or female or to determine anything further.

The bone was clearly fractured, with only the upper end remaining. Most likely however, this occurred after death in moving of the body.

There were no other findings and from this examination it is not possible to determine the cause of death in this person.

CAUSE OF DEATH:

It is my determination that the cause of death in case number **GL05 043(ii) BP** was:
Unascertained

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed:.....

Dr John Clark MB ChB FRCPath Dip FM

Date: 12.10.99
